Axiom Storage Assessment — Detailed, Independent, Secure

Secure retention and ready access to corporate information is critical to every company's success. Our storage assessment provides an unbiased and independent recommendation on how your company's digital assets may be protected and shared securely. We also chart an image-based workflow for your consideration that maximizes your IT investment while reducing operating costs.

Organizations that can benefit from instant, secure access to their archived and live data, those anticipating a period of rapid growth, or are simply evaluating the effective use of their storage resources would greatly benefit from Axiom's detailed assessment of their IT storage systems. Storage Assessments are often able to identify ways to lower the overall administrative and total cost of ownership (TCO) for these systems. A review of your data storage infrastructure will also assist in Regulatory Compliance and also highlight any gaps that may exist in your Business Continuity / Disaster Recovery strategy.

Did you know?

- Growth patterns indicate data has been roughly doubling every two years. Going forward, it's likely to double every 18 months or less. — *CompTIA*
- Improved storage systems can yield annual ROI from 125 percent to 500 percent. — *IBM*

Rapid developments in technology have made it possible for companies to keep pace with the rising demands for data and content storage, but have also crowded the industry. Developing an optimal data storage strategy and choosing from all available options can be a daunting task. Leverage off Axiom's technology neutral assessment to take the right decision that is in alignment with your company's objectives.

Comprehensive report with objective information on...

- System architecture and topology
- Green initiatives, such as power consumption and environmental footprint
- Time-to-access and utilization metrics
- Storage and business continuity systems.
- Administration and management
- Compliance goals for SOX and HIPAA
- Available options for virtualization, consolidation and reducing TCO.

Information Management Experts

With years of experience in providing Information Management services and solutions, our team has the necessary resources and expertise to help you reach your information management goals.

Gain a new perspective

Our deliverable is a fresh, analytic and unbiased report on which to make key decisions. Axiom does not resell hardware, so our recommendations provide an independent point-to-point comparison between your existing systems and the leading products in the industry.
